Important Safety Information

Read these simple guidelines. Breaking the rules may be dangerous or illegal. Further detailed information is given in this user guide.

Violation of the instructions may cause serious injury or death.

◆ Safety Information

- Never use an unapproved battery since this could damage the phone and/or battery and could cause the battery to explode.
- When charging, please do not remove the battery

- Never place your phone in a microwave oven as it will cause the battery to explode
- Do not dispose of your battery by fire or with hazardous or flammable materials.

- Make sure that no sharp-edged items such as animal's teeth, nails, come into contact with the battery. There is a risk of causing a fire.

- Store the battery in a place out of reach of children.
- Be careful that children do not swallow any parts such as rubber plugs (earphone, connection parts of the phone, etc.). This could cause asphyxiation or suffocation.

- Unplug the charger during lightning storms to avoid electric shock or fire.

- When riding in a car, do not leave your phone or set up the hands-free kit near to the air bag. If wireless equipment is improperly installed and the air bag is activated, you may be seriously injured.
- Do not use a hand-held phone while driving.

- Do not expose the battery charger or adapter to direct sunlight or use it in places with high humidity, such as a bathroom.
- Never store your phone in temperatures less than -15°C or greater than 50°C.

- Do not use the phone in areas where its use is prohibited.

- Do not use harsh chemicals (such as alcohol, benzene, thinners, etc.) or detergents to clean your phone. There is a risk of causing a fire.

- Do not drop, strike, or shake your phone severely. Such actions may harm the internal circuit boards of the phone.

- Do not handle the phone with wet hands while it is being charged. It may cause an electric shock or seriously damage your phone.

- Do not disassemble the phone.
- Do not place or answer calls while charging the phone as it may short-circuit the phone and/or cause electric shock or fire.

- Only use the batteries and chargers provided and approved by UNICAIR. The warranty will not be applied to products provided by other suppliers.
- Only authorized personnel should service the phone and its accessories. Faulty installation or service may result in accidents and consequently invalidate the warranty.

- Allows you to enter 3 SOS numbers. You can call these SOS numbers 100, 101, 102 even when the phone is locked or restricted.

Safety Information

Please read and observe the following information for safe and proper use of your phone and to prevent damage. Also, keep the user guide in an accessible place at all the times after reading it.

Violation of the instructions may cause minor or serious damage to the product.

Charger and Adapter Safety

- The charger and adapter are intended for indoor use only.

Battery Information and Care

- Please dispose of your battery properly or take it to your local wireless carrier for recycling.
- The battery does not need to be fully discharged before recharging.
- Use only UNICAIR-approved chargers specific to your phone model since they are designed to maximize battery life.
- Do not disassemble or short-circuit the battery.
- Keep the battery's metal contacts clean.
- Replace the battery when it no longer provides acceptable performance. The battery can be recharged several hundred times before replacement.
- Recharge the battery after long periods of non-use to maximize battery life.
- Battery life will vary due to usage patterns and environmental conditions.
- Use of extended backlighting, Mini-Browser, and data connectivity kits affect battery life and talk/standby times.
- The self-protection function of the battery will cut the power of the phone when its operation is in an abnormal state. In this case, remove the battery from the phone, reinstall it, and turn the phone on.

Explosion, Shock, and Fire Hazards

- Do not put your phone in a place subject to excessive dust and keep the minimum required distance between the power cord and heat sources.
- Unplug the power cord prior to cleaning your phone, and clean the power plug pin when it is dirty.
- When using the power plug, ensure that it is firmly connected. If it is not, it may cause excessive heat or fire.
- If you put your phone in a pocket or bag without covering the receptacle of the phone (power plug pin), metallic articles (such as a coin, paperclip or pen) may short-circuit the phone. Always cover the receptacle when not in use.
- Do not short-circuit the battery. Metallic articles such as a coin, paperclip or pen in your pocket or bag may short-circuit the + and – terminals of the battery (metal strips on the battery) upon moving. Short-circuit of the terminal may damage the battery and cause an explosion.

General Notice

- Using a damaged battery or placing a battery in your mouth may cause serious injury.
- Do not place items containing magnetic components such as a credit card, phone card, bank book or subway ticket near your phone. The magnetism of the phone may damage the data stored in the magnetic strip.
- Talking on your phone for a long period of time may reduce call quality due to heat generated during use.
- When the phone is not used for a long period time, store it in a safe place with the power cord unplugged.
- Using the phone in proximity to receiving equipment (i.e., TV or radio) may cause interference to the phone.
- Do not use the phone if the antenna is damaged. If a damaged antenna contacts skin, it may cause a slight burn. Please contact an UNICAIR Authorized Service Center to replace the damaged antenna.
- Do not immerse your phone in water. If this happens, remove the battery immediately. If the phone does not work, take it to an UNICAIR Authorized Service Center.
- The power cord on this product will expose you to lead, a chemical known to the State of California to cause (cancer) birth defects or other reproductive harm. Wash hands after handling
- Do not paint your phone.
- The data saved in your phone might be deleted due to careless use, repair of the phone, or upgrade of the software. Please backup your important phone numbers. (Ring tones, text messages, voice messages, pictures, and videos could also be deleted.) The manufacturer is not liable for damage due to the loss of data.
- When you use the phone in public places, set the ring tone to vibration so as not to disturb others.
- Do not turn your phone on or off when putting it nearby your ear.

1. Introduction

Congratulations on your purchase of the advanced and compact UN510C cellular phone, designed to operate with the latest digital mobile communication technology, Code Division Multiple Access (CDMA). Along with many advanced features of the CDMA system such as greatly enhanced voice clarity this phone offers:

- Messaging, Voice mail, and Caller ID.
- Voice Record
- High capacity battery for Long stand-by and talk time.
- Choice of 20 preload ringtones + 50 downloadable Ring Tones.
- Easy-to-Use menu
- Any key answer, 99 speed dialing.
- Optional accessories with greater convenience and enhanced functionality.
- English and Hindi language support.

3. Getting Started

Installing and Removing the Battery

Charge the battery fully before the initial use of the phone.

The phone comes with a rechargeable battery. Keep the battery charged while not in use in order to maximize talk and standby time when using the phone.

- To install, insert the battery into the opening on the back of the phone, and insert the bottom of battery into groove at the bottom of the handset. Gently press down the cover until the latch snaps into place.
- To remove, power off the handset. Push the back cover down. Push the tab with one finger and lift the top of the battery to separate.

Charging the Battery

Use the charger provided with your phone:

Warning! Use only the charger provided with the phone or authorized by UNICAIR.

Use any chargers other than above mentioned may damage your phone or battery.

- Plug the round end of the adapter into the phone's charger port. The battery level will move after the correct connection.
- The charge time varies depending upon the battery level. The maximum charge time for a fully discharged battery is 5 hours.

Installing the UIM Card

Power off your phone and remove the battery. Slip the metallic UIM card holder to open it, then place the UIM card in the slot. Make sure the gold-colored contact on the UIM card facing down into the slot. Close the holder to lock the UIM Card.

Battery Charge Level

The battery charge level is shown at the top right of the LCD screen.

When the battery charge level becomes low, the low battery sensor will alert you in three ways: sounding an audible tone, blinking the battery icon outline, and displaying Low battery. Recharge soon, if the battery charge level becomes exceedingly low, the phone will automatically switch off and any function in progress will not be saved.

Caring for the Battery

- If you use the unauthorized battery, it may cause the damage to or explosion of the battery. Therefore, please prohibit using the unauthorized ones.
- You do not need to wait until the battery completely runs down to recharge the battery.
- Use only UNICAIR batteries and chargers specific to your model of phone. UNICAIR's chargers are designed to maximize battery life.
- Do not disassemble or short-circuit the battery.
- Keep the battery's metal contacts clean.
- Replace the battery when it no longer provides acceptable performance. The battery can be recharged several hundred times before it needs replacing.
- Recharge the battery if it has not been used for a long time to maximize battery life.
- Do not expose the battery charger to direct sunlight or use it in areas of high humidity, such as the bathroom.
- Do not leave the battery in hot or cold places as it may deteriorate battery performance.
- Long backlight settings, searching for service, data connectivity, and synchronization all may affect battery life, talk, and standby times.

5. Basic Operation

5.1 Turning the Phone On and Off

5.1.1 Turning the Phone On

- 1) Install a charged battery pack or connect the phone to an external power source such as the cigarette lighter charger or car kit.
- 2) Hold down  for 2 seconds until the LCD screen flashes.

5.1.2 Turning the Phone Off

Press and hold the  until the display screen turns off, then release the key.

5.2 Signal Strength

If you're inside a building, being near a window may give you better reception. You can see the strength of the signal by the signal indicator  on your phone's display screen.

5.3 Power Saving Mode

When the phone is in an area without service for about 15 minutes, it stops searching for service and enters into the Power Saving Mode. When your phone activates this

feature, Power Saving is displayed on your screen. The phone automatically checks for service periodically or you can check manually by pressing any key.

5.4 Speaker Phone

This function is a convenient feature which enables you to call using loudspeaker when you need. Pressing **[OK]** key in the call could switch to using the loudspeaker.

5.5 Making Calls

Every time you make a call, follow these steps:

- 1) Make sure that the phone is turned on. If not, hold down  for 2 seconds.
- 2) Type the phone number or select one contact in the phone book, then press .
 - If the phone is locked, type the lock code. The lock code/password is commonly 0000 by default.
- 3) To end the call, press .

Note: In no service area,  appears on the screen. When trying voice call in no service area, "Call failed" is displayed. It means you are in no service area.

5.6 Receiving Calls

- 1) When the phone rings or vibrates (if the Vibrate Mode is enabled), press  to answer.
 - When a coming call is received, press **[Left Soft]** key, the phone stops ringing or vibrating but the coming call would not be canceled. Press **[Right Soft]** key to reject the call.
 - You could cancel the coming call by pressing  directly.

- 2) To end an answered call, press .

Note: When the phone is in headset mode, you could press and hold headset key for 0.5sec to answer a coming call, or press and hold headset key for 2sec to end a call.

5.7 Redialing Last Outgoing Number

Press key  twice to redial the last number in Recent Calls.

- You can also dial any of the last 60 (Dialed + Received + Missed) numbers stored in the Recent Calls.

5.8 Quickly Adjust

5.8.1 Adjusting Vibrate Mode

Use Vibrate Mode in a public place.

On standby screen, activate Vibrate Mode quickly by pressing the **[#]** (for 2 seconds) instead of using the Menu function.

- When Vibrate Mode is on, Key tone does not sound.

Note: To cancel Vibrate Mode, press **[#]** for 2 seconds.

5.8.2 Selecting Simple Profiles

Profiles let you choose your phone's sound setting according to your environment you are in. Just pick the profile (from: Vibrate Only / Silent / General / Outdoor) which suits your current environment.

- 1) In standby mode, press **[Left]**
- 2) Select one of four Simple Profiles **Vibrate Only**, **Silent**, **General** and **Outdoor** with **[Up]** or **[Down]**.

3) Press < **Set** > or [**OK**] to select.

5.9 Shortcut Menu

On standby screen, press [**Down**] to enter into Shortcut Menu.

Shortcut Menu is convenience for you to access to favorite menu quickly. Max 10 items can be stored in Shortcut Menu.

To Set Shortcut Menu please follow the step 7.9.5 Shortcut Menu on page No.33

5.10 Speed Dial

Speed dial is a convenient feature, which allows you to make phone calls quickly and easily. Your phone recalls the phone number from your personal contact list, displays it briefly and then dials it.

Memory locations 1 to 9 should be used for one touch dialing for your most frequently used phone numbers.

- 1) To register speed dial please follow the step 7.2.4 Speed Dial on page No. 24.
- 2) To dial any number, enter memory location number 1 to 99 .

Basically allocated speed dial is as follows;

- (1) *89 (Voice Mail)
- (2) 12900 (Voice Station)
- (3) 12524 (Customer Care Prepaid)
- (4) 121 (Customer Care Postpaid)
- (5) 197 (Directory Assistance)

5.11 Mute

The mute function prevents the other party from hearing your voice in a calling, but allows you to hear the other party.

- 1) Select < **Options** > - < **Mute** > during a call.
- 2) To cancel the Mute function, select < **Options** > - < **Unmute** > again.

5.12 Call Waiting

While a call is in progress, you may hear two beeps indicating another incoming call. When call waiting is enabled, you can put the active call on hold while you answer the other incoming call.

This service should be provided by your service provider.

- 1) Press  to receive a waiting call during the first call.
- 2) Press  again to switch between two calls.

5.13 Caller ID

Let you know who is calling by displaying the number of the person calling when your phone rings. If the caller's name and number are already stored in your phone book, the corresponding name appears with the number.

This service should be provided by your service provider.

5.14 Message

This function is a convenient feature which enables you to entry messages menu by pressing [**Right**] key on standby screen.

6. Entering and Editing Information

Entering Information Using T9 Text Input

You can edit the Banner, Scheduler, Short Message and Contacts using T9 Text Input. T9 Text is an easy way to write. In this input method, you only need to press a key once for each letter. Your Phone also supports the T9 Text Input in Hindi language.

Key Functions

- In text input process, press [**Left Soft**] key to select **< Options >** - **< Entry Mode >**, then you could select the input mode from **T9Hindi, Hindi, T9English, Abc, 123**
- [*] **Shift Key** : Changed in all input Mode.
- [2]~[9] (Type Text): In T9 mode, press one key per letter to enter text.
- [0] (change word): In T9 mode, press to display other matching words.
- [1] (Punctuation): in ABC mode and T9 English Mode, press to insert punctuation in a word, then complete a sentence.
- [0]~[9] (Type Numbers): In 123 (Numbers) mode, press once to enter numbers.
- [#] (Space): Press to complete a word or insert a space.
- [**Right Soft**] **Key - < Clear >** :
 - Press to delete a single space or character.
 - Press and hold to delete entire words.

8. General Information

● Main Unit

Item	Description
Tx Frequency	Digital : 824 ~ 849 MHz
Rx Frequency	Digital : 869 ~ 894 MHz
Channel Bandwidth	1.25 MHz
Tx Power	Digital : LOWER: 0.2W ~UPPER:1W
Rx Sensitivity	-104 ~ -25dBm
Size(mm)	102 X 45 X 14 (L X W X H)
Weight(g)	62(with battery)
	42 (without battery)
Operating Temperature	0 ~ 55℃

● AC/DC Adapter

Item	SMPS Type Description
Input Voltage	AC 100 ~ 240V
Input Frequency	50 / 60Hz
Output Voltage	5.2V~5.6V(DC), 0.4A

● Battery

Item	Description
Capacity	800mAh
Talk duration time	140Minutes
Standby duration time	180 Hours
Charging duration time	5 Hours

ANNEX RF Exposure Information and Statement

The SAR limit of USA (FCC) is 1.6 W/kg averaged over one gram of tissue. Device types UN510C (WN5-UN510C) has also been tested against this SAR limit. The highest SAR value reported under this standard during product certification for use at the ear is 1.320 W/kg and when properly worn on the body is 0.744W/kg. This device was tested for typical body-worn operations with the back of the handset kept 1.5cm from the body. To maintain compliance with FCC RF exposure requirements, use accessories that maintain a 1.5cm separation distance between the user's body and the back of the handset. The use of belt clips, holsters and similar accessories should not contain metallic components in its assembly. The use of accessories that do not satisfy these requirements may not comply with FCC RF exposure requirement, and should be avoided.

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

NOTE: The manufacturer is not responsible for any radio or TV interference caused by unauthorized modifications to this equipment. Such modifications could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protections against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
